

PRIVATE ENTERPRISE AI

Insights to Action.

Turn enterprise knowledge and data into answers,
insights and decisions.

SAUDI-BUILT · ENTERPRISE-READY · DESIGNED FOR TRUSTED AI

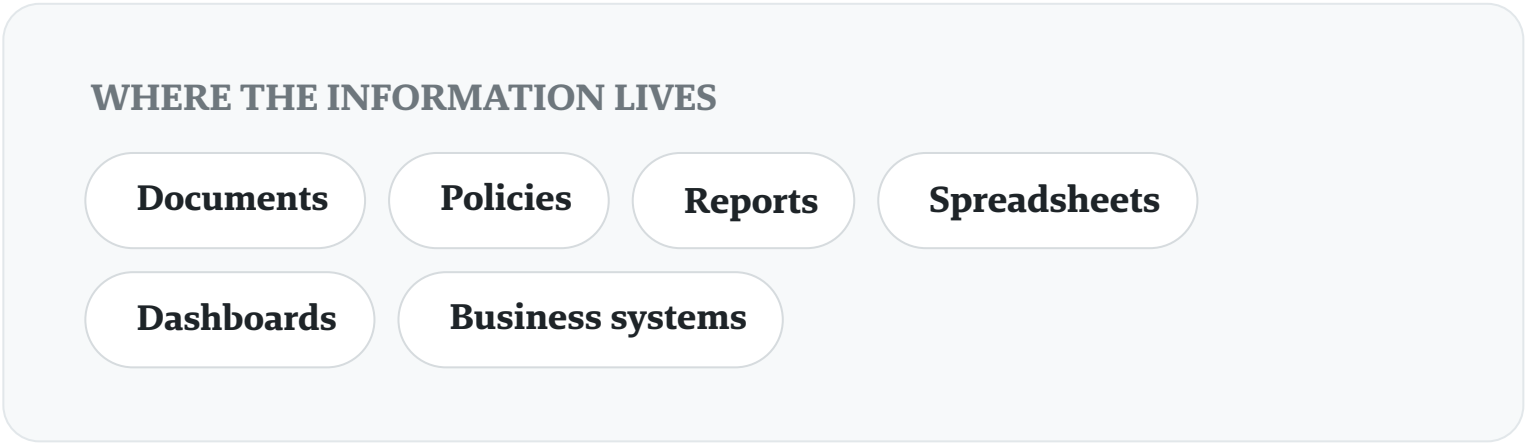

A Product by  **DataPlus**

THE ENTERPRISE REALITY

The information exists. The answer still takes too long.

Answering one management question can still require multiple people, applications and interpretations.

nuhaa.ai shortens the distance between information and action.

ONE ENTERPRISE AI EXPERIENCE

Ask. Understand. Analyze. Decide.

nuhaa.ai creates a trusted conversational layer across enterprise knowledge and data, enabling different users to access the intelligence they need without navigating the underlying complexity.

NUHAA.AI KNOWLEDGE

Understand

Enterprise knowledge at your fingertips.

NUHAA.AI INSIGHTS

Analyze

Move from questions to data-driven insight.

NUHAA.AI EXEC

Decide

Bring the signals that matter to management.

One intelligence layer. Different levels of decision-making.

SAUDI-BUILT · ENTERPRISE-READY · DESIGNED FOR TRUSTED AI

A Product by  **DataPlus**

Turn enterprise knowledge into answers.

Policies, procedures, reports and institutional knowledge become accessible through natural conversation.

Less searching

Faster access

Consistent answers

Source-grounded responses

“

What is our procurement approval process for contracts above the defined threshold?

From finding documents to understanding them.

Ask the business question. Get to the insight faster.

Business users and analysts explore structured enterprise data through natural-language questions.

“

Which region is behind target this quarter, and what is driving the variance?

Less time assembling reports. More time understanding the business.

03 · EXEC

From insight to executive action.

nuhaa.ai Exec brings together the signals management needs to understand performance, investigate change and focus attention.

“What requires my attention this week?”

Built for decisions, not just dashboards.

SAUDI-BUILT · ENTERPRISE-READY · DESIGNED FOR TRUSTED AI

01

SIGNAL

What changed?

02

CONTEXT

Why does it matter?

03

ACTION

Where should management focus?

“What is off target?”

“What changed from last month?”

“What requires escalation?”

“Where is the biggest opportunity?”

ENTERPRISE AI, BUILT FOR THE KINGDOM

Intelligence without surrendering control.

PRIVATE

Designed for enterprise information rather than public AI consumption.

GROUNDED

Answers are based on authorized organizational knowledge and data.

CONTROLLED

Access can follow enterprise permissions and information boundaries.

SAUDI-BUILT

Developed with the operating, regulatory and data-sovereignty expectations of Saudi organizations in mind.

nuhaa.ai is designed to support enterprise deployments aligned with organizational requirements around data residency, privacy, governance and controlled access.

**Your enterprise intelligence stays
enterprise intelligence.**

Knowledge to answers. Data to insight. Insight to action.

Insights to Action.

PRIVATE ENTERPRISE AI

Saudi-built. Enterprise-ready.
